| <ul style="list-style-type: none">• DISPOSABLE PLATES• 3 DIAMETER PUNCHER• BALLS OF ACRYLIC YARN• NEEDLES WITH ROUNDED TIPS | <ul style="list-style-type: none">• PIPE CLEANER ROLL• ADHESIVE BLACK EYES• DECORATIVE STRETCH SPIDER WEB• Halloween GLITTERY FELT STICKERS |
|--|--|

And also:

+ Educational material

Cutting, weaving, gluing

Steps

Form the spider:

- Take the 6 strands in one hand, fold them in half, and form a loop by crossing the threads. You will get a loop and 6 strands on each side.
- The loop represents the body of the spider: shape it into a round form if needed.
- Spread the 6 strands that form the legs: shorten them gradually to have the shortest ones in the middle.
- Fold the ends (about 1 cm from the tip of the strands) to perfect the shape.
- Glue 2 or more eyes onto the body of the spider (at the crossing point of the strands).

Attach the spider to the plate by inserting a few legs into the holes.
Stretch decorative webbing and sprinkle with eyes and glittery stickers for a spider-themed decoration!
